Inventory Management of Academics Project.

Problem Statement:

1. Project are the key important thing in the academics of the college student. Every college want that their students should do as much as project that they can do. College will assign dedicated teacher to the same but the teachers can con keep track of all the projects of the college.

2. They cannot assure the student that this project is already been completed or someone is doing it or it has already reach at some point so they can contact to the project leader and take the project further ahead.

3. In order to solve this problem, create a web app that can track all the projects in the college and help the student in learning and move ahead.

4. Web app they can assure the student that this project is already been completed or someone is doing it or it's already reach at some point in order that they can contact to the project leader and take the project further ahead.
